Summary

Software Engineer || web Developer

I am a knowledgeable frontend developer that brings superior user experience to promote an organisation specific website presence. My competencies involve the comprehension and execution of React , Nextjs, MongoDB,Redux ,Git, Firebase, NodeJS & Express , to generate custom webpage design and development. I am also a Functional Programmer with the knowledge of C , C++,Java and Python .

I have a detail-oriented methodology approach with about 2yr+ of experience in maintaining website responsiveness, effectiveness, maintenance, with Good SEO practice , which informs my diligence & commitment .

I look forward to collaborate with any other developers/designers for more skills acquisition
