Summary

Frontend Developer || Software Development

I am a knowledgeable frontend developer that brings superior user experience to promote an organisation specific website presence. My competencies involve the comprehension and execution of HTML, CSS, JavaScript, Bootstrap, NodeJS & React languages to generate custom webpage design and development. I am also a Functional Programmer with the knowledge of C , C++ and Phython.

I have a detail-oriented methodology approach with about 1yr+ of experience in maintaining website responsiveness, effectiveness which informs my diligence & commitment.

I look forward to collaborate with any other developers/designers for more skills acquisition
